

# RESIN FIBER DISCS

Available in Aluminum Oxide, Zirconia and Ceramic in standard hole or with quick change hub for your convenience.

These discs offer a superior cutting rate and a cool grinding action for extended disc life.

Different grades are available for your use to grind steel or non-ferrous metals

These discs are available in 24 to 120 grit.

This air cooled back up pad draws air up behind the disc to extend life and provide effective grinding action.

**Slotted Hub back up pad**

Replacement nut and wrench are available separately!

Available in 3", 4 1/2" and 5" with aluminum oxide or silicon carbide in grits 24, 36, 60 and 120.

These discs are designed with grit applied to a hard plastic backing offering a highly versatile grinding disc that requires no back up pad.

This disc can be trimmed on its edge when it no longer grinds effectively.
