

CARTRIDGE ROLLS & SPECIALITY PRODUCTS

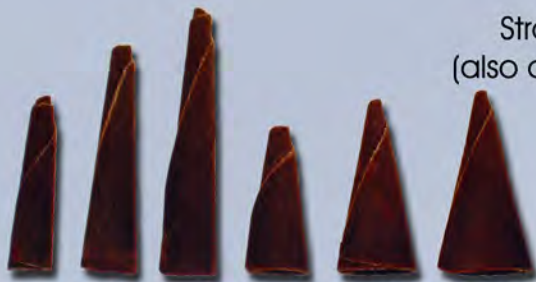

Cartridge rolls are available in many sizes and grits designed for continuous cutting action for your hard to reach places.

Straight and Tapered
(also available in S/C & Zirc)

Mandrels available for all products.

Cone points are great for deburring holes!

Eyelet stars, overlap slotted disc, cones and wing disc also available.

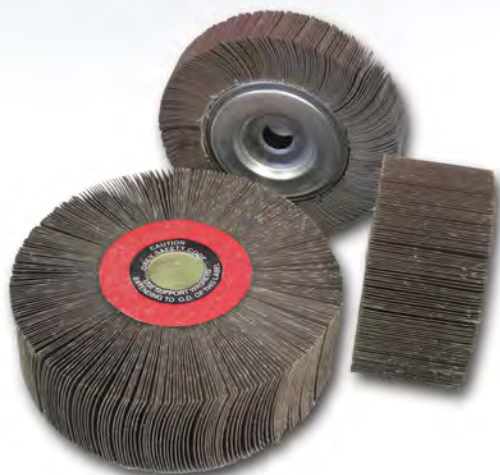

Square pads are great for fast cutting action to remove weld beads while layers cut through continuously to expose fresh grain.

Cross pads offer flexible sanding for tubes, deburring holes and cleaning cylinders.

FLAPWHEELS

Available in A/O, X-weight cloth, from 4" to 8" diameter with varying widths to meet your needs.

Used for deburring and polishing. These flap wheels conform to workpiece for a consistent sanding surface.

MOUNTED FLAP WHEELS

Mounted flap wheels are small enough to sand in hard to reach areas with uses of deburring, blending and polishing. Great to use in or outside of tubes!

Available in shank or threaded mounts.
