

Abrasive sleeves available to fit any size of pneumatic drums. Made out of premium Aluminum Oxide grain with a cloth backing. Also available in zirconia and silicon carbide.

These sleeves conform to the contoured shapes of your product to produce a smooth finish while maintaining optimum belt life.

## DRUM SANDERS

Speed up production with an air inflated pneumatic drum allowing the sanding sleeve to form to your product. Available in varying sizes from 2" to 8" diameter.

Replacement canvas covers and tubes available.

## SPIRAL BANDS

These spiral bands allow precise sanding on curved or contoured surfaces. Available in many grits and sizes to meet your application.

Rubber expanding drums are available to fit all spiral bands required for your application. Drums are available in solid rubber or slotted.
