

CUT OFF WHEELS

High quality reinforced cut off wheels are available in depressed centers or flat.

For use with your die grinders for a burr free cut. Also available with 5/8-11 hub.

Both cut off wheels and grinding discs are offered in 4" to 9" diameters.

GRINDING DISC

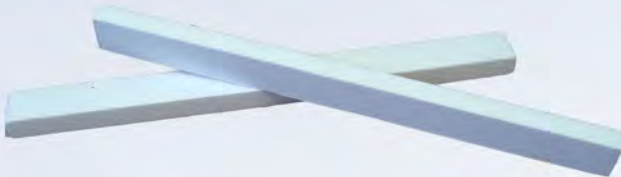

These discs offer a great method to grind metals with a quick cut, edge strength and long life.

Available with a depressed center or flat to use with your angle grinders. Also available with 5/8-11 hub.

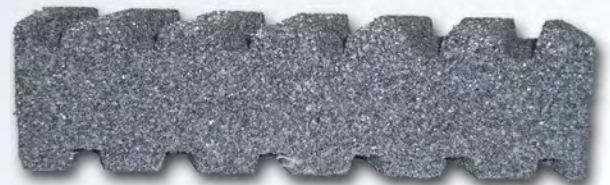

STONES

Available in many types, grits and shapes for your hand grinding, finishing and sharpening needs.

Also available in mounted shaped cones.

Vitrified grinding wheels also available in main grades for your heat sensitive tool steels, chrome, alloys and extremely hard metals.

Rubbing bricks available in plain or fluted for dressing grinding wheels, scouring castings or rubbing down concrete. Also available with handle.
