

SLASHED & BRUSHED LOADINGS

This reloadable finishing wheel is designed to finish contoured wood products. It offers light stock removal, de-nibbing and cleaning between sealer coats.

Quick and easy change over!

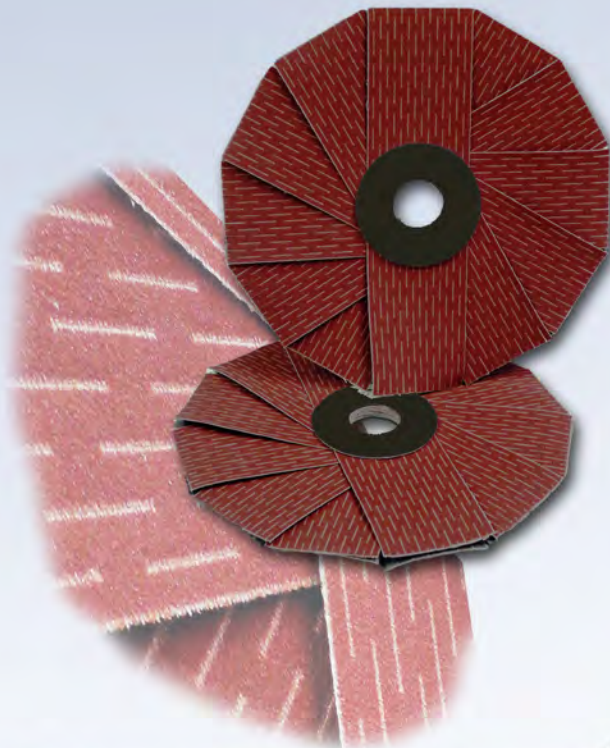

Variety of widths and lengths are available in aluminum oxide or silicon carbide cloth.

Loading sets are available in slashed aluminum oxide or silicon carbide grain for your 12", 14" or 16" brush sanding heads. Brushes available in short or long trim to fit your standard width heads.

Made with abrasive cloth and brush combination in a one piece design. A variety of slashes are available to give you the right amount of cut to achieve the desired finish.

FLUTTER DISC

Made with aluminum oxide cloth in flexible J weight or X weight to conform to those hard to finish areas on intricate wood pieces.

Slashes offer sandpaper to release and give full coverage of the part by creating a fine cutting edge.

Stack these discs side by side to create your desired width.

These wheels are designed with a standard 8" diameter.
