

WIDE BELTS

Paper

Antistatic Aluminum Oxide is perfect for white wood sanding and all other types of wood.

Silicon carbide works well for final finish, between sealer coats and lacquer finish.

Zirconia paper is also available.

FINTECH can use their technical engineering knowledge to find the right material and sequence for your desired finish.

A variety of belt joints are available to offer you the smoothest finish

Pressure Belts
For cross and wide belt sanding.

Cloth

Available in Aluminum Oxide, Silicon Carbide, Zirconia and Ceramic in both X and Y weight.

Used for sanding solid wood and all types of metal.

Cloth backing offers more stock removal and better durability. A/O and S/C gives you a consistent finish with a high cut rate.

Zirconia or Ceramic works well for planing wood and exceptional cut on metal..

Call **FINTECH** for technical assistance with all your finishing needs.
