

# CLOTH DISCS

PSA

Available up to  
36" diameter.

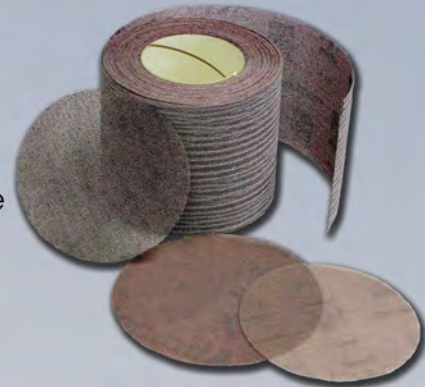

Available in PSA only with Aluminum Oxide, Zirconia or Silicon Carbide grain. On a durable X-weight or J-Weight cloth back that holds up against your toughest jobs.

Used on wood, metal, non-ferrous metals, and plastics.

J-weight gives you cut with flexibility and the X-weight is for aggressive cutting and heavy stock removal. These discs will hold tight, yet remove easily.

We also offer a wide variety of screen abrasives!

# FILM DISCS

PSA and Hook & Loop

Available in PSA or Hook & Loop with aluminum oxide grain.

Used for finish removal on metal, wood, solid surface materials, composites and plastics.

The film backing is designed for consistent surface finish and to prevent grain shelling with a top size to offer load-resisant and durability.
